

BIO[®] FOR DYNAMICS[™] GP

THE ONLY DYNAMICS
BI SOLUTION THAT WILL
JUMPSTART YOUR
ANALYTICS BUSINESS

**STRENGTHEN EXISTING
CLIENT RELATIONSHIPS.
BUILD NEW ONES.**

A BI practice puts you firmly in control. No need to wait for the next big Dynamics product announcement to broaden your client base or have a new solution to offer your existing clients. BIO is the only Dynamics BI solution that eliminates the barriers and lowers the cost of entry to building an analytics practice.

BIO can be fully customized. Forget about pre-configured mega cubes that are not user friendly and cannot be made client specific. You choose the right solution for you and your clients — out-of-the-box or customer specific. Plus, BIO lets you leverage existing consultant resources already in your practice, and developer experience is not required. Partners will experience immediate business building results.

BIO for Dynamics SL is available directly from Microsoft.
