

The Complete Business Intelligence Solution for Microsoft Dynamics

BIO® is a complete end-to-end business intelligence and reporting solution made expressly for Microsoft Dynamics™. BIO combines a world class visualization tool with a full-featured business intelligence platform and connections to Microsoft Dynamics data as well as the ability to connect with other data sources and multiple delivery options.

Use BIO to identify trends and exceptions for rapid decision making, maximize the value of information coded to Dimensions, streamline analysis by eliminating cumbersome manual data retrieval and aggregation processes, automatically create KPI's or metrics to better monitor business operations, enhance employee productivity, and improve your bottom line.

There is a BIO solution for any size need, from low cost, entry-level applications to end-to-end solutions for the entire enterprise. Get the most out of your Microsoft Dynamics data, without programming.
